KARLA VASQUEZ

kdvasque@gmail.com | kdvasquez.github.io | linkedin.com/in/kdvasquez

EDUCATION

University of Southern California **Aug 2021 – May 2025**
B.S. Computer Engineering and Computer Science Los Angeles, CA

- **Relevant Coursework:** Data Structures & Object Oriented Design, Embedded Systems, Algorithms, iOS App Development, Full Stack Web Development, IoT, Computer Networks

EXPERIENCE

Ingenia 3Design **Oct 2026 – Present**
Freelance Full Stack Developer Remote

- Building an online catalog and storefront for a small business, defining requirements for online ordering and email responses

Platia **Sep 2025 – Sep 2026**
Software Engineer Intern Remote

- **Office Web:** Upgraded a financial operations dashboard to **Angular 19** and **TypeScript 5.7** without losing existing functionality, and deployed it using **Docker** and **Dokploy**
- Reduced runtime dependencies **73% (49 to 13)** and component count **60% (81 to 31)** by consolidating four styling systems into **Tailwind CSS** and **Angular Material**
- **Platia Pay:** Enabled payment, wallet, account-management, and transaction workflows across two applications by implementing **70+ REST API integrations**
- Configured automated **CI/CD pipelines**, including environment-specific builds, **Cloudflare Workers** deployments, and production release validation

PROJECTS

MindSpark (Swift, SwiftUI, Anthropic Claude API) **Apr 2026**

- Built an iOS learning app with **two practice modes and five AI-assisted features**, using **SwiftUI and the Claude API** to provide hints, explanations, stories, difficulty adjustments, and progress summaries
- Made AI-dependent logic testable without live API calls by separating mock and live services; added **local data storage** and **XCTest/XCUITest** coverage

WanderPost (Swift, SwiftUI, Firebase) **May 2025**

- Designed an **MVVM**-based **SwiftUI** postcard journal that turns photos into shareable postcards with **MapKit** pins, **CoreLocation** tagging, and **live weather data**
- Implemented offline journaling and cloud sharing using **Codable** for local persistence and **Firebase Storage** and **Firestore** for uploads, with user-visible error handling

The SCavenger (C, Embedded Systems) **Feb 2025 – Apr 2025**

- Designed an environment-aware puzzle game with GPS-triggered challenges, achieving **60% RAM reduction** on a 2KB SRAM microcontroller while integrating 4 I2C sensors within a $100 budget

RESEARCH & TEACHING

HeyTutor **Sep 2025 – Jun 2026**
Academic Tutor Soledad, CA

- Tutored **15+ students** across grades 3–5 in English and Math, leading groups of 5 in 45-minute sessions and adapting pacing to mixed learning levels in real time

USC ANRG Summer Research Academy **May 2023 – Aug 2023**
Undergraduate Researcher Los Angeles, CA

- Conducted research on AI-driven personalized learning using GPT-3.5; authored a sole-author abstract accepted to IFoRE 2023 Research Forum
- Analyzed weekly user-interaction data to identify engagement patterns, iterating research methodology with a faculty advisor

SKILLS

- **Languages:** TypeScript, JavaScript, Swift, Python, C/C++, Java, SQL, HTML/CSS, Spanish
- **Frameworks & Tools:** Angular, Tailwind CSS, SwiftUI, Astro, Firebase, REST APIs, Git, Docker, Unix, MongoDB
- **Certifications:** AWS Certified AI Practitioner, 30 Day Substitute Teaching Permit
